PROFESSIONAL SUMMARY

Product-focused Frontend Engineer with 3.8+ years building scalable dashboards, web applications, and CMS-based websites using React.js, Next.js, TypeScript, and WordPress. Architected an Event Management Platform serving 3,000+ users - improving UI performance by 30% and reducing load time by 20%. Strong in Redux Toolkit, REST API integration, RBAC systems, and component-driven architecture.

EXPERIENCE

Frontend Developer (Remote)

Netsquare

Feb 2025 - Present

Bangalore

- Architected Event Management Platform (3,000+ users, 15+ admins)
- Designed multi-tenant RBAC dashboard with modular feature isolation
- Improved rendering by 30% and load time by 20% via code-splitting, lazy loading & SWR caching
- Built real-time calendar with concurrent scheduling conflict handling
- Built E-Commerce Admin Panel using Next.js with product management, order tracking and RBAC workflows
- Developed and deployed 15+ production WordPress websites including custom theme development, plugin integration

Frontend Developer (Freelance & Contract)

Remote

Apr 2024 – Feb 2025

Odisha, India

- Delivered Limited Cart — a multi-category E-Commerce platform with cart management, gender-based filtering, and responsive UI
- Built Elite Work — a production website for a Bangalore-based interior design agency serving real clients
- Implemented search, filtering & pagination for datasets handling 10,000+ records
- Managed end-to-end delivery — from client requirement gathering to Vercel production deployment

Frontend Developer

Searching Yard Group

Jun 2022 – Mar 2024

Odisha, India

- Built scalable dashboards for HRMS, CRM & E-Commerce platforms.
- Designed reusable component architecture using React & TypeScript.
- Implemented secure authentication and role-based workflows across internal systems.
- Handled large datasets (10,000+ records) with pagination, filtering, and search across HRMS, CRM & E-Commerce dashboards
- Reduced frontend load time by 20% through Vite build optimization and lazy loading

KEY PROJECTS

Event Management Platform

Tech: React.js · Vite · TypeScript · Redux Toolkit · SWR · Material UI

- Core challenge: Building concurrent scheduling conflict resolution in a real-time calendar with multi-user state sync
- Chose SWR over React Query for built-in revalidation and simpler caching strategy for this use case
- Implemented multi-tenant architecture isolating data and features per admin role without separate

deployments

- Outcome: 30% faster rendering · 20% reduced load time · 3,000+ active users in production

Product Management Dashboard

Live: product-management-dashboard-webapp.vercel.app

GitHub: github.com/Coader-Sasmi/product-management-dashboard

Tech: React · Next.js · TypeScript · Redux Toolkit · MUI · Recharts · React Hook Form · Axios

- Built full CRUD dashboard with add, edit, delete and real-time state updates using Redux Toolkit
- Integrated Recharts for product analytics and data visualization
- Implemented React Hook Form with validation for complex product forms
- Built search, filtering & pagination for large product datasets

Limited Cart

Live: limited-cart.vercel.app

GitHub: github.com/Coader-Sasmi/limited_cart

Tech: Next.js · TypeScript · Tailwind CSS · REST API

- Delivered multi-category E-Commerce platform with gender-based sub-filtering, cart state management, and fully responsive UI across 6 product categories
- Managed end-to-end client delivery — from requirement gathering to Vercel deployment

HRMS & CRM Dashboard Platform

Company: Searching Yard Group (Internal Product)

Tech: React.js · TypeScript · Axios · ApexCharts · Redux · REST API · Vite

- Built end-to-end UI and API integration for both HRMS and CRM platforms from scratch
- Implemented multi-role access system with role-specific dashboards and permission-based feature visibility
- Integrated ApexCharts for data visualisation - displaying HR analytics, sales metrics, and performance reports

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass (Basic)

State Management: Redux Toolkit, SWR, React Hooks, Context API

Styling & UI: Material UI (MUI), Tailwind CSS, Framer Motion, Responsive Design

API & Integration: REST APIs, Axios, Async Programming

Build Tools: Vite, Webpack, Babel

Testing: Jest, React Testing Library (Basic)

Tools: Git, npm, Yarn, Vercel

CMS: WordPress (15+ production websites, theme customization, plugin integration)

Core Concepts: Performance Optimization, Code Splitting, Lazy Loading, RBAC, Component Architecture, Agile/Scrum, Cross-browser Compatibility, Responsive Web Design, Web Performance, CI/CD

EDUCATION

Sambalpur University Institute of Information Technology

Master Of Computer Application

Sambalpur, Odisha, India

Jun 2018 – Jul 2021

Nilakantheswara Degree Mahavidyalaya

Bachelor Of Science

Angul, Odisha, India

Jun 2015 – Aug 2018
