PROFESSIONAL SUMMARY

Performance-driven Frontend Engineer with 4+ years of professional experience architecting high-performance dashboards, SaaS web applications, and enterprise CMS architectures. Deep production expertise in Next.js, React.js, TypeScript, and Redux Toolkit. Proven track record of independently shipping multi-tenant Role-Based Access Control (RBAC) applications, optimizing frontend data caching via SWR, and improving UI paint performance metrics by up to 30%. Fully aligned to scale asynchronous workflows within cross-functional, global remote teams.

TECHNICAL SKILLS

Core Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass

State Management & Caching: Redux Toolkit, SWR, Context API

UI Architecture & Animation: Tailwind CSS, Material UI (MUI), GSAP, Framer Motion

Tools & Ecosystem: Git, Vite, Webpack, Vercel, REST APIs, Axios, CI/CD, WordPress, Jest, Agile/Scrum

PROFESSIONAL EXPERIENCE

Netsure | Frontend Engineer (Remote)

Feb 2025 – Present

- Architected and shipped an Event Management Platform serving over 3,000+ active users and 15+ admin nodes, isolating complex state boundaries via multi-tenant RBAC logic.
- Engineered a concurrent real-time calendar engine, resolving complex client-side event scheduling conflicts smoothly through immediate UI optimistic updates.
- Boosted UI core web vitals by 30% and reduced initial bundle transfer sizes by 20% using advanced code-splitting, lazy-loading routes, and custom SWR memory caching configurations.
- Built an E-Commerce Admin Panel dashboard featuring nested route layouts, detailed order-tracking pipelines, and interactive canvas components using Tailwind CSS.

Independent Software Consultant | Frontend Developer (Contract)

Apr 2024 – Feb 2025

- Engineered 'Dalal Street', a production SEBI-registered fintech application, implementing third-party payment gateway integrations, strict TypeScript-validated workflows, and premium sub-forms.
- Developed 'Limited Cart', an enterprise e-commerce web platform, writing modular context-driven cart managers and advanced multi-attribute user filtering layers.
- Owned end-to-end product delivery cycles from initial architectural wireframes to high-availability production deployment automation scripts on Vercel.

Searching Yard Group | Frontend Developer

Jun 2022 – Mar 2024

- Built scalable analytical dashboards for cross-enterprise HRMS and CRM internal tools utilizing React, TypeScript, and ApexCharts.
- Optimized large-scale grid layers handling 10,000+ high-frequency record datasets, integrating efficient server-side pagination, sorting, and data filtering mechanics. Reduced build-time compilation constraints by 20% by successfully migrating historical pipeline infrastructures over to Vite.

SELECTED CORE PROJECTS

SaaS Event Management Core Platform (React, Vite, TypeScript, SWR)

Full-scale booking suite supporting role-isolated visibility, real-time metrics dashboards, and responsive, component-driven layouts.

Fintech & Interactive Analytics Hub (Next.js, TypeScript, ApexCharts, Redux Toolkit)

Advanced data-driven charting client tracking transactional histories, secure authentication routes, and custom UI components styled natively via Tailwind CSS.

EDUCATION

- Master of Computer Applications (MCA) | Sambalpur University Institute of IT (2018 – 2021)
- Bachelor of Science (B.Sc.) | Nilakantheswara Degree Mahavidyalaya (2015 – 2018)
